

NLP Master Practitioner Certification

In the Master Practitioner certification, a small group of participants goes through a rigorous process that uses the core skills of NLP to build bulletproof thinking. You learn to apply patterns of thought and behaviour more quickly, more flexibly and more effectively. And you learn to make choices about your responses and your goals, no matter what comes your way.

This course includes 6 days of online training, one-to-one coaching sessions, and off-line assignments. We will be providing hard copy materials by mail, and soft-copy materials through Dropbox. Graduates of the Online NLP Master Practitioner Certification have all the rights and benefits of graduates of the traditional course. You'll also see immense benefits in your ability to interact meaningfully and effectively online.

The NLPCT Master Practitioner Curriculum

Day 1: Recognize and change unconscious patterns in yourself and others. This includes setting up better patterns using outcome formation and intention; calibration; use of scaling to make progress tangible; introduction to the Enneagram; and a review of logical levels (the Human Face of Change)

Day 2: Emotional intelligence: Develop and maintain states under stress. Notice the effects of fatigue, frustration and resistance on peak performance states and make adjustments to mindset. Learn to move to adjacent states to step towards desired states in yourself and others.

Day 3: Time and Timing. Become aware of the difference between clock time and your internal sense of time. Build timing into your outcomes for interactions and goals. Develop awareness of how unconscious beliefs about time and chunking are influencing your progress towards goals.

Day 4: Framing and Reframing. Learn to identify frames in conversation, to enlarge frames to reduce emotional impact, and to shift to different frames to uncover new possibilities and opportunities. Develop an awareness of how structure guides states and behaviours.

Day 5: The Language of Choice and the Language of Freedom. Explore the interaction of the Meta Model and Ericksonian Language to narrow down to focus and decision or to open up to more possibilities. Practice directing attention to smaller or larger frames and using narratives as frames. Learn how stories engage and guide beliefs and awareness.

Day 6: Strategies for Deliberate Optimism. Understand how to recognize, explore and shift strategies to overcome obstacles or explore opportunities. Apply NLP practices to develop and maintain a mindset of deliberate optimism.

Course Fees

Courses are payable by cash, cheque, or major credit card. All certifications are subject to applicable taxes.

Certification courses are payable in full or by instalments. There are never any fees or interest charges when you make your payments on time each month.

You may always arrange a customized payment plan to cover the cost of your course. There will be no additional fees or interest charges as long as you make your payments on time.
